

Pool Factsheet by Pelican Waters Pool Shop

Maintenance

Jenni from Pelican Waters Pool shop recommends the five-minute pool work week. Aptly named, it is a program to help maintain your pool in the summer by weekly oxidising and sanitising (like a chlorine boost), which only takes five minutes but helps keep your pool in perfect condition. Pelican Waters Pool shop also offers a monthly pool service where a technician goes to your home and does all the work for you.

PH levels should be checked to ensure they are balanced, if they are too high it could cause burning eyes and stinging skin.

Pelican Waters Pool Shop offer free in-store water testing and can provide the necessary pool chemicals to fix any problems.

Sometimes a clear looking pool does not mean that it is a clean pool. Invisible bacteria can cause illness and disease, so it is important to have a trained professional check that your pool water is clean and healthy.

Safety

A pool fence is a legal mandatory requirement in Australia, and it is essential to prevent accidents.
